

I am writing to **strongly** urge you to reject NAB's petition 04-160. I am a happy satellite radio listener. I have never found such variety and quality in local radio -- a signal that doesn't go away, no matter where I am. I should add that since XM radio introduced local traffic and weather, I have been a VERY happy listener. Please don't allow big business to determine what I can listen to. I pay for these services, because local radio just doesn't provide me with what I need.
